SKILLS

Languages: C/C++, Python, JavaScript, TypeScript, SQL

Web Technologies: React.js, Next.js, Node.js, Express.js, REST APIs, HTML5, CSS3, Tailwind CSS

Databases & Tools: MongoDB, PostgreSQL, Git, GitHub, Docker, Postman

WORK EXPERIENCE

The Money Plant Club, BMS Institute of Technology and Management

Technical Lead

- Led technical projects aimed at improving financial literacy, trading, and business fundamentals among students.
- Guided the development of educational applications and tools through hands-on project-based learning.
- Mentored peers on programming concepts, project development workflows, and software engineering best practices.
- Collaborated with cross-functional teams to translate financial education goals into functional technical solutions.

OVERCLKOCK Hackathon

3rd Place Winner

- Secured **3rd Place** in a 2-day hackathon hosted by Institution's Innovation Council, BMSIT&M.
- Built **MockMaster AI**, a developer tool to eliminate frontend delays caused by unavailable backend APIs.
- Designed a system that generates fully functional **REST APIs and realistic mock data** using simple English prompts.
- Implemented features such as error simulation, API testing playground, ready-made examples, and secure API key testing.
- Demonstrated rapid problem-solving, AI-driven workflows, and end-to-end product development under tight deadlines.

EDUCATION

BMS Institute of Technology and Management, Bangalore

Bachelor of Engineering (B.E.) in Computer Science and Engineering

CGPA: 8.7/10

Relevant Coursework: Programming in C and C++, Object Oriented Programming, Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Web Technologies, Software Engineering

PROJECT WORK

- **Deepfake Detection Web Application (2024):** Developed an AI-based deepfake detection system using a ResNeXt CNN + LSTM architecture, achieving **93.6% classification accuracy**. Trained models on 6,000+ video samples with preprocessing pipelines including frame extraction and face detection. Built a full-stack MERN web application enabling video upload, inference requests, and real-time prediction results. Implemented backend APIs using Node.js and Express, with MongoDB for storing user data and prediction metadata. Containerized the application using Docker for scalable deployment. *Tech: React, Node.js, Express.js, MongoDB, Python, ResNeXt, LSTM, OpenCV, Docker*
- **FlashPrint – College Printing Service Platform (2024):** Developed a production-ready full-stack web platform for college print shop management, enabling students to upload documents, customize print options, and track orders in real time. Implemented secure authentication using NextAuth.js with Google OAuth and role-based access control (Student, Faculty, Admin). Built an admin dashboard with order management, delivery tracking, revenue analytics, and Excel report generation. Integrated UPI-based payment workflow with QR code generation and end-to-end order status tracking. Designed a responsive UI using Tailwind CSS and shadcn/ui, and containerized the application using Docker. *Tech: Next.js 14, TypeScript, PostgreSQL, Prisma, NextAuth.js, Tailwind CSS, TanStack Query, Docker, REST APIs*
- **MockMaster AI – REST API Generator (OVERCLKOCK Hackathon — 3rd Place, 2024):** Built an AI-powered developer tool to eliminate frontend delays caused by unavailable backend APIs. Designed a system that generates fully functional REST APIs and realistic mock data using simple English prompts. Implemented features such as error simulation, API testing playground, ready-made examples, and secure API key testing to improve developer productivity. *Tech: JavaScript, REST APIs, AI-driven workflows*

AWARDS AND CERTIFICATES

- **Hackathon Winner & Finalist (2024–2025):** Placed among top teams in multiple inter-college and national-level hackathons.
- **Technical Leadership Recognition:** Acknowledged for leading and mentoring peers in building technology-driven projects.
- **Full-Stack Web Development Training:** Completed hands-on training in modern web development and REST APIs.
